100 COLLS

FRANCE

Annex I

Last updated : 23/06/2026

1. DISTANCE LIMIT

In order to preserve the spirit of the challenge – a test of strategy, management and discovery rather than a race against the clock – a maximum distance of **1,800 km** is established for the calculation and classification of the 100 Colls.

For the purpose of calculating this maximum distance, only the kilometres ridden during the active hours of the challenge shall be taken into account. Any kilometres ridden outside the active hours, regardless of the reason (transfers, searching for accommodation, meals, refuelling or any other circumstance), **shall neither be included in the calculation of the 1,800 km limit nor be subject to any penalty.**

The mileage shall be determined based on the track recorded by **Rabbit Rally**, applying a **+5% tolerance margin**. In the event of a dispute, the official Rabbit Rally track shall be **re-measured using the Garmin Tread® application**, and the distance most favourable to the participant shall be retained. **The distance determined following this re-measurement process shall be deemed accurate and final, and no additional tolerance margin shall apply.**

Exceeding the 1,800 km limit will result in a **penalty of 50 points for each kilometre or part thereof** exceeding this limit, in accordance with the provisions set out in this Annex I.

All other articles of the 2026 Regulations remain unchanged.
